CORE FEATURES

- Guardian Angel (check-in system with emergency alert)
- Live Tracking (share via QR code, no account required)
- AR Navigation (waypoints in camera view)
- 29 Heatmap analysis modes
- Full Apple Watch standalone support
- Multi-Endpoint Broadcasting (send to TMS, FMS, own servers simultaneously)
- Fleet tracking without hardware (every employee iPhone becomes a tracker)
- OUP/STS interfaces (integration with existing logistics systems)

USPs – What Makes OpenTracker Unique

USP	Description
 Zero-Cloud	All data local on iPhone – no server, no risk
 100% GDPR	Developed in Spain, hosted in Germany
 Multi-Endpoint	Send to multiple servers simultaneously
 Watch Standalone	Works even without iPhone nearby
 No Account	Share live tracking without registration
 Offline-capable	Full functionality without internet
 Fleet-Ready	Integration with existing TMS/FMS systems
 Hardware-free	No extra tracker needed – iPhone is enough
 50+ Languages	From German to Ukrainian
 Privacy by Design	Not retrofitted, but built from the ground up
